

## SECURITY? ... Of course!

Now you can replace the broken hockey stick that you used to rely on for security.

Each **Integral** window features a cam style, positive lock, that actually locks the window more tightly as it is engaged.

## Still don't feel safe?

Each cam lock is backed up with a secondary security trigger that can only be activated from inside your home.

## Want even MORE security?

The glazing stops, which are used to secure the glass in place, can't be removed from outside by an intruder.

## OPTIONS? We've got them all!

10 Standard Sizes!  
Custom Sizes too!

- 28¼ x 7
- 28¼ x 9½
- 28¼ x 11½

Keeping Canadians safe with windows  
built in Canada, by Canadians,  
with Canadian materials.

## Replacement Basement Windows

The **Integral** system can be used in many applications, but more specifically to convert the sashless sliders of an old steel basement window into a safe and attractive, energy saving component of your home.
